

MAKING THE RIGHT CONNECTIONS

What is the Weatherproof Range?

The Weatherproof range of electrical connectors represents the cutting edge of technology. Designed to be fully reliable in the most advanced conditions, the Weatherproof connectors are simple and quick to use.

- THE BROADEST RANGE OF WEATHERPROOF CONNECTORS
- DESIGNED FOR TODAY'S PROFESSIONAL ELECTRICIANS
- HIGH PERFORMANCE ELECTRICAL CONNECTORS

RESISTANT TO CORROSION (COPPER) Steel, brass, zinc, nickel, stainless steel, aluminium, copper, brass	LONG LIFE EXPECTANCY Three year life expectancy for standard applications	EASY TO INSTALL Push-on design with no tools. Fully waterproof and tamper-proof design for guaranteed reliability over time	RECYCLED MATERIALS (POLYMER) Available in fully recycled Weatherproof polymer

Weatherproof In-Line Circular Joint Connectors

Ideal for connections in small spaces requiring a high degree of protection.

Comprehensive components, a robust design, easy to install and tamper-proofing. TeeTubes are tamper-proof for use, giving maximum protection, making them an ideal solution for your In-Line applications.

Weatherproof connectors are used in many situations, for example connecting power and lighting cables in a particular installation scenario, or to protect against fire incidents, in factory and garages.

Now you can look for a solution wherever the TeeTube range.

These are the most popular TeeTubes used for all applications. They have a maximum cable size of 20mm and are made from brass. They are fully tamper-proof and have a maximum protection rating of IP68.

TTK 20 BK TeeTube (20mm) 2 Way connector with TeePin	TTK 20 AA TeeTube (20mm) 2 Way connector with TeePin	TTK 20 CA TeeTube (20mm) 2 Way T-Adapter connector with TeePin

TTK 20 BK The TeeTube range is sold complete and ready for installation.	TTK 20 AA Comprehensive and complete system of the TeeTube range. It is also tamper-proof.

Quick Plug & Socket Connectors

High Performance cables, full range of applications.

The Quick Plug and Socket Connectors allow for easy connection to standard equipment. A full protection rating of IP68 is available. Available in a wide range of cable sizes and cable types.

It also allows for the TeeTube range to be used in many situations, for example connecting power and lighting cables in a particular installation scenario, or to protect against fire incidents, in factory and garages.

TKP 20 BK TeePlug and TeeSocket	TKP 20 AA TeePlug and TeeSocket

TKP 20 BK: The TeePlug and TeeSocket range is made from brass. It has a maximum cable size of 20mm and a maximum protection rating of IP68.

TKP 20 AA: The TeePlug and TeeSocket range is made from brass. It has a maximum cable size of 20mm and a maximum protection rating of IP68.

Micro Plug & Socket Connectors

Compact connectors for Micro TeeTube cables. They are made from brass and have a maximum cable size of 10mm. They are fully tamper-proof and have a maximum protection rating of IP68.

TKM 10 BK Micro TeePlug and TeeSocket	TKM 10 AA Micro TeePlug and TeeSocket

TKM 10 BK: The Micro TeePlug and TeeSocket range is made from brass. It has a maximum cable size of 10mm and a maximum protection rating of IP68.

TKM 10 AA: The Micro TeePlug and TeeSocket range is made from brass. It has a maximum cable size of 10mm and a maximum protection rating of IP68.

Junction Boxes & Current Distributors

Non-metallic boxes and plug & socket connections for quick installation solutions.

TJB 20 AA	Terminal Block TB200	TCD 20 AA

TJB 20 AA: The TeeTube Junction Box is made from brass. It has a maximum cable size of 20mm and a maximum protection rating of IP68.

TB200: The TeeTube Terminal Block is made from brass. It has a maximum cable size of 20mm and a maximum protection rating of IP68.

TCD 20 AA: The TeeTube Current Distributor is made from brass. It has a maximum cable size of 20mm and a maximum protection rating of IP68.
